EXPERIENCE

Intern

Hayleys Advantis Limited   2021 Jun – 2021 Dec

- Utilized design software such as justinmind to create high-fidelity mockups.
- Collaborated with development teams to ensure design implementation aligns with user experience goals.
- Developed and maintained code for web pages that adhere to industry standards and best practices.
- Utilized responsive design techniques to ensure optimal user experience across different devices and screen sizes.
- Developed a web application from scratch using ASP.NET Core and Dapper as the primary technologies.
- Conducted testing and debugging to ensure the application functions as expected.
- Collaborated with cross-functional teams to identify opportunities for process improvement and implemented changes accordingly.
- Created database schema and implemented data models using Microsoft SQL Server.
- Conducted performance tuning and optimization to ensure efficient database queries.

UI & UX PROJECTS

Zero Waste Management System Case Study
2022 Dec

- Conducted research on waste management by designing and conducting questionnaires to gather user feedback and understand their challenges in handling waste effectively.
- Developed user personas, empathy maps, and journey maps to gain a deep understanding of the users and their needs in order to design an effective waste management system.
- Created user flow and information architecture diagrams to map out the user experience and identify potential pain points in order to improve the user experience.
- Utilized wireframes to design the waste management application, while ensuring a user-friendly interface and optimal functionality.

Elevate Technologies Web Design   2022 Jan

- Redesigned website layout with a focus on improving visual appeal and usability.
- Developed high-fidelity prototypes using Figma.
- Actively kept up to date with industry trends and emerging technologies to incorporate into design concepts.

EDUCATION

Saint Aloysius College Galle
